SUMMARY

Software Engineer (B.E. CSE – DevOps, 2026) with hands-on experience building and deploying full-stack applications and working across cloud infrastructure and Linux environments. Proficient in C++ with a strong DSA foundation (150+ problems solved, GATE 2026 qualified). Skilled in designing RESTful APIs with Node.js and MongoDB, and in Docker, Kubernetes and AWS. Completed two internships (Full Stack and DevOps) and participated in 10+ hackathons.

EDUCATION

Chandigarh University — **Punjab, India**
Bachelor of Engineering in Computer Science Engineering (DevOps) – CGPA: 7.67 — *2022 – 2026*

TECHNICAL SKILLS

Programming Languages: C++
Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, RESTful APIs, Microservice Concepts
Databases: MongoDB, Supabase, SQL
DevOps & Cloud: Linux, Docker, Containers, Kubernetes, AWS (EC2, S3, IAM, VPC, CloudWatch, EKS)
Tools & Technologies: Git, GitHub
Core Concepts: DSA (C++), OOP, SDLC, Computer Networks, Operating Systems, Linux Administration

PROJECTS

FindIt – Lost & Found Web Platform
React, JavaScript, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary

- Live Demo
- Built a full-stack lost and found application enabling users to report, browse and recover items.
- Designed RESTful APIs with Node.js, Express.js and MongoDB for scalable data handling.
- Implemented JWT-based authentication with secure registration, login, protected routes and encrypted passwords.
- Designed advanced search and filtering (category, location, date range, keyword); integrated Cloudinary for image uploads with a responsive Tailwind CSS and Shadcn/UI interface.

EffiSphere – Employee Monitoring Platform
React, JavaScript, Supabase, Tailwind CSS, Geolocation API

- Live Demo
- Built an employee attendance and monitoring platform with GPS-based geofencing and real-time analytics.
- Implemented automated check-in/check-out using a 200-meter GPS geofence to prevent time theft.
- Developed dual admin and employee dashboards with role-based access control.
- Integrated real-time location tracking and heatmaps; designed a scalable system for hybrid and remote workforce operations.

WORK EXPERIENCE

DevOps Summer Intern
Celebal Technologies, Remote, India — *June 2025 – August 2025*

- Completed a structured DevOps and cloud internship with hands-on modules, guided assignments and labs.
- Worked on a capstone DevOps project involving application deployment and automation.
- Gained practical exposure to cloud infrastructure and Linux environments.

Full Stack Developer Intern
Kraf Technologies, Remote, India — *April 2025 – June 2025*

- Contributed to frontend and backend development of the company's Krafcool production website.
- Developed and enhanced website features under senior developer guidance, following the software development life cycle.
- Collaborated with the team to debug issues and improve website performance.

ACHIEVEMENTS

- **Qualified GATE 2026 (CS).**
- **Participated in 10+ hackathons during college.**
- **Solved 150+ DSA problems on coding platforms.**
